

Epsilon

For the Safe Protection of Keys for the Home and Small Office

Epsilon Key Safes are designed to secure keys; be they car keys, office keys or site keys. The Epsilon Key Safe provides more protection than the typical light steel cabinets available from stationers.

Key Features

- Door is made of 6mm steel and the body is made of 2mm steel.
- 16mm diameter steel bolts operating in three directions secure the door.
- Epsilon cabinets have a key deposit feature on the side of the safe which allows keys to be securely deposited inside. Once inside, an anti-fishing plate prevents their removal.
- Keys are stored on key hooks which, thanks to internal ladder racking, can be adjusted to accommodate keys of different lengths.
- Epsilon comes in two lock options
 - Double bitted 8 level key lock
 - Programmable electronic lock
- A four point anchoring kit is supplied so the safe can be securely rear fixed to resist unauthorised removal once installed
